<b>Preface</b>	<b>v</b>
<b>1 Spaces</b>	<b>1</b>
1.1 Linear Spaces and Linear Operators . . . . .	1
1.1.1 Linear spaces . . . . .	1
1.1.2 Linear independence, basis and dimension . . . . .	6
1.1.3 Linear transformation . . . . .	8
1.2 Normed Linear Spaces . . . . .	12
1.2.1 Norm on a linear space . . . . .	13
1.2.2 Examples of norms . . . . .	15
1.2.3 Inner product spaces . . . . .	25
1.3 Banach Spaces . . . . .	27
1.3.1 Examples and properties . . . . .	27
1.3.2 Semi-norms and quotient spaces . . . . .	40
1.4 More About Inner Product Spaces . . . . .	47
1.4.1 Orthogonality and orthonormal basis . . . . .	47
1.4.2 Bessel's inequality . . . . .	50
1.5 Hilbert Spaces . . . . .	53
1.5.1 Fourier expansion and Parseval's formula . . . . .	54
1.5.2 Riesz-Fischer theorem . . . . .	55
1.5.3 Projection theorem . . . . .	56
1.6 Problems . . . . .	59
<b>2 Operators</b>	<b>65</b>
2.1 Bounded Linear Operators . . . . .	65
2.1.1 Space of bounded linear operators . . . . .	66
2.1.2 Examples of bounded linear operators . . . . .	70
2.1.3 Conditions for continuity . . . . .	75
2.2 Riesz Representation Theorem . . . . .	78
2.2.1 Adjoint of an operator . . . . .	83

2.2.2	Self adjoint, normal and unitary operators . . . . .	87
2.3	The Dual Space of Certain Spaces . . . . .	89
2.3.1	Dual of some sequence spaces . . . . .	90
2.3.2	Dual of some function spaces . . . . .	93
2.4	Compact Operators . . . . .	95
2.4.1	Examples of compact operators . . . . .	98
2.4.2	Examples of non-compact operators . . . . .	101
2.5	Problems . . . . .	102
<b>3</b>	<b>Some Important Theorems</b>	<b>106</b>
3.1	Closed Graph Theorem . . . . .	106
3.1.1	Bounded inverse theorem . . . . .	114
3.1.2	Open mapping theorem . . . . .	116
3.1.3	Uniform boundedness principle . . . . .	117
3.2	Hahn-Banach Extension Theorem . . . . .	119
3.2.1	The theorem and its consequences . . . . .	120
3.2.2	Proof of the theorem . . . . .	123
3.2.3	Further consequences . . . . .	127
3.2.4	Problems . . . . .	130
<b>4</b>	<b>Spectral Results</b>	<b>133</b>
4.1	Eigen Spectrum and Approximate Eigen Spectrum . .	133
4.2	Resolvent Set and Spectrum . . . . .	141
4.3	Spectral Results for Self Adjoint, Normal and Unitary Operators . . . . .	147
4.4	Spectral Representations . . . . .	152
4.5	Problems . . . . .	161
